Re: Mitchell Browning / Finline Construction

The intent of this reference letter is to outline and detail some of the personal experiences and projects that have been performed for me by Finline Construction.

During the past 10 years I have contracted with Mitchell Browning for numerous construction projects of varying scope and size. All projects have been completed in a timely manner, within budgetary guidelines, and with the highest degree of quality.

Projects have varied from a master bath addition at my Sharon Road residence to rebuilding a multilevel deck and terrace at my Lake Norman home. Additionally, he has performed carpentry functions including re-roof, siding replacement, window change-outs, and interior trim modifications.

I have a very high confidence level in his ability to properly assess the obvious as well as the latent construction condition such that the most desirable result can be achieved with the highest quality at the most cost effective price.

I am available to discuss any of the projects he has completed for me as well as attest to the integrity with which his work is executed.
